

Impact of Expiration of Enhanced Premium Tax Credits for PA Congressional District 1*

- If the enhanced premium tax credits (EPTCs) expire, every county in Pennsylvania will be impacted.
- 3 of every 4 enrollees on Pennie have only experienced enrollment with the EPTCs in effect.
- Without EPTCs, monthly premiums for Pennie enrollees would increase by 82 percent on average.
- Visit pennie.com/affordability for more details.

2025 Metal levels (End of Open Enrollment)

Average expected premium increase for the district if the tax credits expire

56%

Net premiums are expected to increase by **56%** on avg. in the district without the EPTCs (this impacts all income levels)

How Families in District 1 Will Be Impacted

A married couple (60 years old) making around \$82,000 annually (pre-Medicare aged)

- With the enhanced premium tax credits, their monthly premium is capped at **8.5 percent, or \$581/month.**
- Without the enhanced premium tax credits, their monthly premium jumps to **23 percent, or \$1,544/month.**
- Expiration of the tax credits results in a **166 percent increase** in this couple's net premium.

A family of four making around \$78,000 annually (middle income)

- With the enhanced premium tax credits, their monthly premium is **4 percent, or \$260/month.**
- Without the enhanced premium tax credits, their monthly premium jumps to **8 percent, or \$541/month.**
- Expiration of the tax credits results in a **108 percent increase** in this couple's net premium.

A married couple (40 years old) making around \$30,660 annually (low income)

- With the enhanced premium tax credits, their monthly premium is **0 percent, or \$0/month.**
- Without the enhanced premium tax credits, their monthly premium jumps to **4 percent, or \$106/month.**
- Expiration of the tax credits results in this couple needing to pay out of pocket for their net premium.
